

B.Tech. in Materials Engineering

Admission 2020

Department of Materials Science and Engineering

This undergraduate program focuses on producing next generation technology leaders for core industrial sectors, academia, and entrepreneurship

Salient courses

- Basics of Materials Science and Engineering
- Advanced Materials Characterization
- Advanced Manufacturing Processes
- Polymers and Soft Materials
- Metallic and Light Weight Materials
- Functional and Electronic Materials
- Computational Materials
- Advanced Research and Industrial Focus

2020 B.Tech. Intake: 40 seats

Major Future Employers

Academia

Aerospace

Defence

Automotive

Petrochemicals

Manufacturing
